

0

Lab Closed

1

Sheath tank is empty

2

Computer was off

3

You forgot what PMT to use

4

Another user is running over their time allotment on the sorter

5

Someone messed with your template

# CYTOMETRY PAIN CHART

6

You forgot which tube was which

7

Data isn't making any sense

8

Now your data is missing, at least you had it before

9

OUT OF COFFEE??

10

Your PI wants you to present an update on your research... THIS AFTERNOON
