Description

Bangs has decided to go buff. Buffers, of course! What did you THINK we meant? We knew you needed them. We had them. And, so now we are just putting them out there for you in the form of ready-to-use Coupling and Storage Buffers.

With pHs ranging from 4.5 to 9.0, our surfactant-free Coupling Buffers are available in 250mL, 500mL, 1000mL, and 2000mL volumes. These coupling buffers can also be used as wash buffers.

As for the Storage Buffers, we offer pH 7.4 and pH 8.5 varieties, both with stabilizers to keep your beads happy.

Storage and Stability

Store at 2-8°C. Proper laboratory technique should be followed to safeguard against introduction of contaminants while pipetting.

Safety

The Storage Buffers contain sodium azide. Sodium azide may react with lead and copper plumbing to form explosive metal azides. Upon disposal of material, flush with a large volume of water to prevent azide accumulation. Please consult the Material Safety Data Sheet for more information.

This product is for research use only and is not intended for use in humans or for *in vitro* diagnostic use.
