

Biomagnetic Separators

Easing Your Separation Anxiety

BEADS • ABOVE THE REST

Designed to accommodate a complete range of applications for magnetic separations, including cell sorting, mRNA and DNA isolation, and biomolecule purification.

Superparamagnetic particles have been utilized extensively in diagnostics and other research applications for the isolation of cells and biomolecules, such as antibodies, nucleic acids, and polypeptides. The biomagnetic separators available from Bangs Laboratories accommodate a complete range of magnetic separation applications, including cell sorting, mRNA and DNA isolation, and the purification of biomolecules.

Our biomagnetic separators feature high-energy neodymium-iron-boron [Nd-Fe-B] magnets that ensure fast separation rates, excellent wall or well retention, and maximum yield. They are suitable for use with each of our magnetic particles lines.

- BioMag®Plus

1.5mL Magnetic Separator

The 1.5mL Magnetic Separator is a durable plastic magnetic separation unit designed to accommodate a standard 1.5mL microcentrifuge tube for research scale magnetic separations. Upon placement of the tube on the separator, the magnet will quickly draw superparamagnetic particles to the wall of the tube and out of the solution. Once separation is complete, with particles held firmly to the wall, the supernatant may be removed. The 1.5mL Magnetic Separator is simple and easy to use with most established bead protocols.

BioMag® Multi-6 Microcentrifuge Tube Separator

The BioMag Multi-6 Microcentrifuge Tube Separator is a durable plastic magnetic separation unit designed to accommodate six 1.5mL microcentrifuge tubes. The magnets and tube holders are positioned to efficiently separate magnetically separate microliter volumes common in molecular biology applications.

BioMag® 96-Well Plate Separator

The BioMag 96-Well Plate Separator is a durable magnetic separation unit designed to accommodate most 96-well plates. The magnetic separator consists of permanent magnets enclosed in a plastic frame.

BioMag® Flask Separator

The BioMag Flask Separator is a 12.5cm x 6cm rectangular magnetic separation unit designed for use with tissue culture flasks. Test tubes may be used with this unit by securing the tubes against the magnet with a rubber band. The unit consists of permanent magnets encased in a plastic frame.

BIOMAGNETIC SEPARATORS

Cat. #	Product Description
--------	---------------------

LS001	1.5mL Magnetic Separator
-------	--------------------------

MS002	BioMag® Multi-6 Microcentrifuge Tube Separator
-------	--

MS003	BioMag® 96-Well Plate Separator
-------	---------------------------------

MS004	BioMag® Flask Separator
-------	-------------------------

Bangs Laboratories supplies a large variety of uniform polymeric and silica microsphere products setting the standards for diagnostic, research, and flow cytometry applications. No matter the project, we have a product that serves or we'll work to custom-design a solution to fit. And that's not the half of it.

We also stand behind our products. Regardless of the size of your question or the size of your company, we offer tech support, absolutely free.

Sound interesting? Give us a call.
